

★★★ Difficulty level ★ easy ★★ moderate ★★★ challenging

Toys and Games  
with Mark Rayner – 16

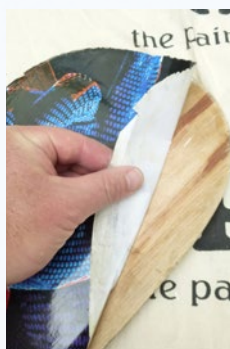

Transform a humble skateboard into a metallic masterpiece with a little bit of help from Resene.

### You will need:

- Clean cloth
- Paintbrush
- Resene Aquaclear gloss
- Resene Quick Dry
- Resene testpots of Resene Optimist and Resene Yeehaa
- Resene testpot roller and tray
- Sandpaper
- Screwdriver
- Skateboard

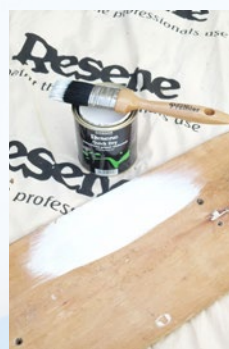

**Step one**  
Unscrew the wheels from the skateboard.

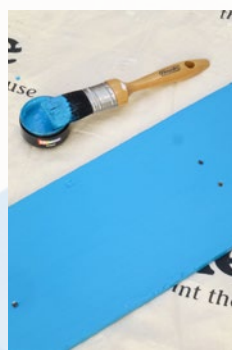

**Step two**  
Carefully remove any plastic transfers or covering.

**Step three**  
Sand the wood to remove any residue and wipe off any sanding dust with a clean cloth.

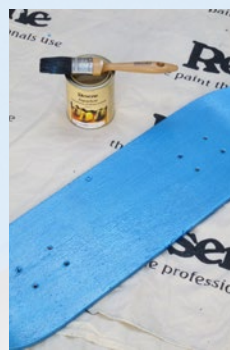

**Step four**  
Apply one coat of Resene Quick Dry to the skateboard and allow two hours to dry.

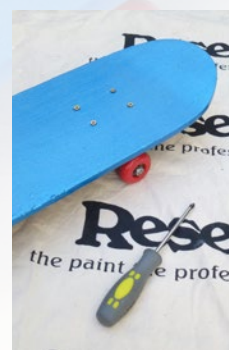

**Step five**  
Apply one coat of Resene Optimist to the skateboard and allow two hours to dry.

**Step six**  
Apply two coats of Resene Yeehaa to the skateboard, allowing two hours for each coat to dry.

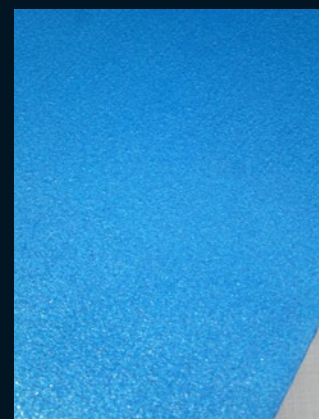

**Step seven**  
Apply three coats of Resene Aquaclear gloss to the skateboard, allowing two hours for each coat to dry.

**Step eight**  
Carefully reattach the wheels, taking care not to damage the paint.

**To get the look:**  
Mark painted the background wall with Resene SpaceCote Low Sheen tinted to Resene Silver Chalice.

**Other ideas:**  
Paint red stripes on the skateboard using Resene Rocket and low tack masking tape.
