

★★★ Difficulty level ★ easy ★★ moderate ★★★ challenging Fun with furniture with Mark Rayner – 39

You will need:

- Clean cloth
- Low tack masking tape
- Paintbrushes
- Resene Lustacryl tinted to Resene Sazerac
- Resene Quick Dry
- Resene testpots of Resene ASAP, Resene Buttercup, Resene Celebrate, Resene Freelance, Resene Fresh, Resene Good Life, Resene Into The Blue, Resene Optimist, Resene Point Break, Resene Ringo and Resene Ruby Tuesday
- Sandpaper
- Wooden chair

Transform a plain chair into a colourful masterpiece using a selection of testpots from Resene.

To get the look:

Mark applied Resene Cristal ClearFloor to the wooden floorboards.

Step one

Remove the upholstered seat from the chair. Sand any areas of bare wood and lightly sand the old paintwork to 'key' the surface.

Step two

Wipe off any sanding residue with a clean cloth.

Step three

Spot prime any areas of bare wood with Resene Quick Dry and allow two hours to dry.

Step four

Apply two coats of Resene Sazerac to the chair (except for the back), allowing two hours for each coat to dry.

Step five

Mask off a series of stripes down the back of the chair, as shown.

Step six

Paint stripes with two coats of Resene ASAP, Resene Celebrate, Resene Freelance, Resene Good Life, and Resene Ruby Tuesday. Allow two hours for the first coat to dry and then remove tape before the second coat has dried. Allow to dry.

Step seven

Mask off a second series of stripes down the back of the chair, as shown.

Step eight

Repeat step six using Resene Buttercup, Resene Fresh, Resene Into The Blue, Resene Optimist, Resene Point Break, and Resene Ringo. Refit the upholstered seat.

Other ideas:

In the same way, create a funky 'barcode' effect using a combination of Resene Black stripes over a basecoat of Resene Alabaster.
