

4 ways with an egg carton

animals

1

Miss Flamingo

Cut up an egg carton into individual cups. Glue two together and paint pink. Cover with hot pink feathers and poke in pipe cleaners to form the legs and neck. Stick on a pair of googly eyes and remember, flamingos always stand on one leg!

2

Jolly jellyfish

Here's one for curling ribbon enthusiasts. Paint an egg carton cup, when it's dry, coat in PVA glue and dip in brightly-coloured glitter. Glue on eyes. Cut ribbon into lengths, curl with a pair of scissors, and glue inside the cup.

3 Pompous peacock

Paint one cup pink and another blue. When dry coat in PVA glue and dip into glitter of the same colour. Add eyes and a pointy beak cut from cardboard. Make two notches for pipecleaner legs and glue the two cups together. Cut a couple of slits into the back cup and insert brightly-coloured feathers.

4 Black widow

Paint two cups black, add eyes and glue the back edges together (a glue gun works well here). Cut four notches on each side and thread four long black pipe cleaners through to create the legs. Bend them in a variety of angles and poses.

Colours by RESENE. Flamingo: Ballerina. Jellyfish: Sugar and spice. Peacock: Superhero, Sugar and spice. Spider: Black.

Expand your children's playing area onto their walls with Resene Blackboard Paint

Transform walls into blackboards with **Resene Blackboard Paint**, a premium scrubbable acrylic coating. Just prepare and prime the wall and apply two coats of Resene Blackboard Paint. If space is limited combine **Resene Magnetic Magic** as the basecoat and Resene Blackboard Paint as the topcoat and create a versatile magnetic blackboard.

Once you've done the hard work, arm your children with chalk and let them run riot! Cleaning up is child's play... just dust the chalk away.
