

★★★ Difficulty level ★ easy ★★ moderate ★★★ challenging Resene kids art with Mark Rayner – 120

### You will need:

- Paintbrushes (including small artists' brush)
- Resene paint stirrer
- Resene Quick Dry
- Resene testpots of Resene Kermit, Resene Rocket and Resene Surfs Up
- Sandpaper
- Saw
- Wool

#### Step one

Create a name tag shape by cutting a piece from the end of a Resene paint stirrer and smooth with sandpaper – you may need a grown up to help with this bit.

#### Step two

Apply one coat of Resene Quick Dry to the name tag and allow two hours to dry.

#### Step three

Apply two coats of Resene Kermit to the name tag and allow two hours for each coat to dry.

#### Step four

Paint the edge and around the hole on the name tag with Resene Surfs Up. Allow two hours to dry.

#### Step five

Paint your name onto the name tag using Resene Rocket and allow two hours to dry.

#### Step six

Thread the name tag onto a piece of wool, as shown, and tie the ends. How neat is that?

#### Top tip:

You could also make a name tag from thick cardboard.

#### Here's another idea:

This cool name tag was made from the end of an old wooden paintbrush and painted with Resene Fizz and Resene Gobstopper.
