

This groovy space-themed ringbinder would be great for science class.

★★★ Difficulty level ★ easy ★★ moderate ★★★ challenging

Resene kids art with Mark Rayner – 5

### You will need:

- Cardboard ringbinder
- Paintbrush
- Pencil
- Resene Art Action Metallics Resene Time Warp
- Resene Multishield+ Gloss
- Resene Quick Dry Acrylic Primer Undercoat
- Silver glitter
- Testpot Resene Black
- Testpot Resene Pearl Shimmer

#### Step one

Paint the ringbinder with one coat of Resene Quick Dry Acrylic Primer Undercoat and leave to dry.

#### Step two

Paint the ringbinder with one coat of Resene Black. Let this dry, and then paint it with a second coat. Leave the ringbinder to dry.

#### Step three

Paint a round planet on the front cover of the ringbinder using Resene Art Action Time Warp. Leave to dry.

#### Step four

Paint a series of loose rings around the planet using Resene Pearl Shimmer – be sure to let some of the black background show through. Apply a thin layer of Resene Pearl Shimmer to the circle. Leave to dry.

#### Step five

Mix a small pot of silver glitter with some Resene Multishield+ Gloss and use this to paint more starry rings around the circle. Leave to dry.

#### Step six

Paint the cover of the ringbinder with one coat of Resene Multishield+ Gloss and leave to dry.

### Top tip:

Draw around a Resene 500ml paint pot to get the right sized circle.

### Here's another idea:

Add a bit of sparkle to your other folders – here we used silver glitter in Resene Multishield+ Gloss over two coats of Resene Red Berry.
