

★★★ Difficulty level ★ easy ★★ moderate ★★★ challenging

Resene kids art with Mark Rayner – 42

### You will need:

- Circular mirror in an MDF frame (ours came from 'Spotlight')
- PVA glue
- Resene Multishield+ gloss
- Resene Quick Dry waterborne primer undercoat
- Selection of multi-coloured buttons
- Resene testpot in Resene Turbo

#### Step one

Carefully remove the mirror from the frame (you might need to get a grownup to help with this bit). Put the mirror to one side, in a safe place.

#### Step two

Paint the entire MDF frame with one coat of Resene Quick Dry waterborne primer undercoat, allowing one hour to dry.

#### Step three

Paint the frame with two coats of Resene Turbo, allowing two hours for each coat to dry.

#### Step four

Apply one coat of Multishield+ gloss to the frame and allow to dry for two hours.

#### Step five

Stick coloured buttons to the front of the frame using PVA glue and allow to dry overnight.

#### Step six

Carefully place the mirror back into the frame (again, you might need a grownup to help with this bit too).

Create a multi-coloured mirror frame with the help of Resene and a bag of brightly coloured buttons.

#### Top tip:

Keep the frame flat while the glue dries otherwise the buttons might move.

#### Here's another idea:

Paint an artists' canvas with a testpot of Resene Keppel and decorate with coloured buttons and sequins to create your own coloured star artwork.
