# Single Pack Vinyl Etch Holding Primer

This highly effective primer/pre-treatment now available in a convenient stable single pack.

As a pre-treatment, blast primer or holding primer Resene Single Pack Vinyl Etch Holding Primer is suitable for a wide variety of applications—steel, galvanised steel, zinc sheet or spray, aluminium sheet and extrusions, spray aluminium, copper and its alloys, old varnished surfaces, etc. And has the advantages of:

- Extremely rapid drying times
- Unsurpassed adhesion over a variety of metal surfaces

- Compatible with most top coats, making it a very useful blast primer
- Excellent abrasion resistance
- Excellent varnish sealer.

Available now from  
Resene Color Shops and better decorating stores.
